Cisco Meraki in San Francisco, USA

The new office space for Cisco Meraki in San Francisco is a tactile home for a digital company. The flooring is a 1350 square meter big combination of tiles in BKB Plain White, Sisal Plain Beige and Sisal Plain Creme, Botanic Osier and Ivy, Artisan Coal and Slate, Graphic String and Draw, Spektra Aurora, Non, Halo and Umov. The mixed flooring is delicately combined with panels in raw wood and design furniture for a contemporary look with a graphic feeling of nature inside.
