Area: 450 m²
Year: 2014
Partner: Flooring Concepts

National Maritime Museum in London, UK

National Maritime Museum in London, UK, is one of the world's largest maritime museum and has been opened to public since 1937. Exhibition designer Vassiliki Holeva chose a playful combination of Bolon Studio™ Triangle in Botanic Cilia and Viva for the renovation of the 450 square meters big shop and education area. The interior is filled with graphic light boxes, signs and colourful furniture creating a truly welcoming space combined with the tactile floor.
